

RIGHT GUIDANCE AND COMPLETE SUPPORT

Building the nation on the shoulders of value based education and translating the aspirations of civil services into reality, through Right Guidance and Complete Support.

Regular Batch:

This course is a mix of teaching, regular evaluation, extempore, expert sessions, field trips and insights in an IAS officer's life through tours to their offices.

The uncertain nature of the examination develops an array of misunderstandings, misinformation and miscalculation, all of which are tackled cumulatively in our classes and individual sessions of faculties, experts and mentors.

The major focus here lies in guiding an aspirant to his own light, rather than imposing on them light of others.

Having a stretched outlay of 10 months, our focus here lies in developing confidence and personality of the student through personal attention by faculty members, peer review climate and group discussions along with the backing of knowledge attained in the class.

This exhaustive yet fun course helps the aspirants, to get their elementary concepts crystal clear. Along with this, daily, weekly and monthly tests assist in continuous review of knowledge gained and ultimately a scientific approach to solve the most complex of problems with ease. This course is a complete package in itself to imbibe the components necessary to clear the exam.
